Business Law With UCC Applications Student Edition

Synopsis

The thirteenth edition of Business Law with UCC Applications updates many key areas of the law. As in previous editions, a great deal of care has been taken to present business law concepts in the most coherent and accessible way and to provide up-to-date coverage of business law topics that are essential to today's students. All of the chapters for this edition have been updated, and we have continued to enhance our coverage of the important topics of cyber-commerce, international law, identity theft, trade secrets, abandoned property, eminent domain, mortgages, bankruptcy, limited liability companies (LLC), ethics, the Dodd-Frank Act, the new health care act, revised Uniform Partnership Act, the Genetic Information Nondisclosure, the War Powers Act, changes in state law regarding collective bargaining, the proposed changes in patent law, proposed changes in the court system, the War Powers Act, and Alternative Dispute Resolution. Material is presented in nine sections, which include relevant case studies featuring excerpts from the court's opinion. Content has been updated to reflect the many recent changes in the legal field and color photos throughout the text help students relate the material to their own lives.

Has multiple erros in the text!!! You would think for \$100 dollars and it being a text book they would do a better job in proof reading. The errors in the book are so bad they make some parts hard to understand.

Rented this for relatively cheap instead of buying the entire book. Good information inside the book.

My teacher tells us to read certain sections and do homework on said sections. Most information is understandable, maybe it's just a hint to better my vocabulary.

I rented this for my business law class it was the required text it was easy too understand and helped me pass my test. I rented the book to save cost I do not see myself reading it in a causal non class sitting but as far as text books go it was good.

Product was as described. Worked out great and much cheaper than buying a new book. The wallet (and wife) appreciated that aspect very much, ha. Fast shipping as well. I would recommend this method of book buying to anyone.

everything was just perfect especially they were including the connect code attached to the book which should be obvious and normal since when Mc Graw sell the book, it would be accompanied by the connect code but some companies sell that code apart because its pretty expensive and needed most of the time.

The layout of this book is difficult to follow. It is great that the key words are highlighted in blue and that in the chapter summary they are listed along with their page numbers but they really need a definition breakout with so much information. The wording is not as clear cut as it should be either.

I can't believe how much this book costs when it is littered with spelling and grammar errors. I like reading aloud so I can concentrate on stuff and I've noticed a ridiculous number of mistakes. This is supposed to be a college textbook, but it sounds like it was written by a group of high schoolers that didn't go back and proofread. I am convinced nobody proofread this book. On page 213, for example, it is discussing a TV, but when it goes to talk about it again, it called it a computer! Literally 3 lines up it says TV and now it calls it a computer. I was very disappointed with the quality of the book and I'm disappointed that professors are making us use poor quality books for class. It would have been a great book if it appeared more professional.

I recommend looking at 's list for renting textbooks over B&N any day of the week, not only is the schedule for returns compatible to the school year but the low cost more than makes up for the pen marks and doodles in the margins. After being left waiting over a month without fulfilling my order by the competition, got my books to me right away with no complications!
