Files: Law And Media Technology (Meridian: Crossing Aesthetics)

Synopsis

Quod non est in actis, non est in mundo. (What is not on file is not in the world.) Once files are reduced to the status of stylized icons on computer screens, the reign of paper files appears to be over. With the epoch of files coming to an end, we are free to examine its fundamental influence on Western institutions. From a media-theoretical point of view, subject, state, and law reveal themselves to be effects of specific record-keeping and filing practices. Files are not simply administrative tools; they mediate and process legal systems. The genealogy of the law described in Vismann's *Files* ranges from the work of the Roman magistrates to the concern over one's own file, as expressed in the context of the files kept by the East German State Security. The book concludes with a look at the computer architecture in which all the stacks, files, and registers that had already created order in medieval and early modern administrations make their reappearance.

Book Information

Series: Meridian: Crossing Aesthetics

Paperback: 216 pages

Publisher: Stanford University Press (April 7, 2008)

Customer Reviews

I've taught this book twice in classes in the archive. Vismann begins by disagreeing with Derrida's critique of Levi-Strauss' "Writing Lesson" in *Tristes-Tropiques* and then proceeds to a quite brilliant juxtaposition of Kafka's "Before the Law" and Melville's "Bartleby the Scrivener." Vismann is Derrida friendly (I paired her book with *Archive Fever*), and she writes incredibly pellucid prose. The translation is superb. I was saddened to learn that Vismann met such an untimely death.
